Please amend paragraph 43 as follows:

In view of the fact that the first further and second further cable path portions cross and further in view of the fact that as cable drum 8 rotates and that portion of cable 10 which is being wound onto or off from the cable drum moves laterally relative to the door then it can be seen that advantageously a bare cable separator 7 can be mounted at the central region ~~3~~ of the carrier 1 in order to guide cable 10 past cable 12 to ensure that they do not 'saw' against each during the raising and lowering of the window glass 25.
